| IV. WQWebDMR (Electronic Discharge Monitoring Reporting) | | | | |
| <p>You must submit monthly discharge monitoring reports using Ecology's WQWebDMR system. To sign up for WQWebDMR, or to register a new site, go to www.ecy.wa.gov/programs/wq/permits/paris/portal.html. If you are unable to submit your DMRs electronically, you may contact Ecology to request a waiver. Ecology will generally only grant waiver requests to those permittees without Internet access. Only a permittee or representative, designated in writing, may request access to or a waiver from WQWebDMR. To have the ability to use the system immediately, you must submit the Electronic Signature Agreement with your application. If you have questions on this process, contact Ecology's WQWebDMR staff at WQWebPortal@ecy.wa.gov or 800-633-6193 or 360-407-7097 (local).</p> | | | | |

V. Site Information

Site or Project Name
Former Woodway High School Multipurpose Sports Fields

Street Address or Location Description (If the site lacks a street address, list its specific location. For example, Intersection of Highway 61 and 34.)

23200 100th Avenue West

Parcel ID#: 27033600202200 (Optional)

Type of Construction Activity (check all that apply):

- Residential
 Commercial
 Industrial
 Highway or Road (city, county, state)
 Utilities (specify): storm, electrical
 Other (specify): grading

City (or nearest city): Edmonds

County: Snohomish

Zip Code:

98020

Site Acreage

Total size of your site/project, including support activities such as off-site equipment staging yards, material storage areas, borrow areas, etc. (that you own/control): 39.75 acres.

Total area of soil disturbance (grading and/or excavating) for *your* site/project over the life of the project: 5.92 acres. (Note: 1 acre = 43,560 ft².)

Concrete / Engineered Soils

How many yards of concrete will be poured over the life of the project? 257 yd³ (estimate)

How many yards of recycled concrete will be used over the life of the project? 0 yd³ (estimate)

Will any engineered soils be used? (For example: manufactured soil stabilizers, fly ash, cement treated base, cement kiln dust, etc.)
 Yes No

Estimated project start-up date (mm/dd/yy): 05/25/2015

Estimated project completion date (mm/dd/yy): 09/18/2015

Record the latitude and longitude of the *main entrance* to the site or the approximate center of site.

Latitude: 47.78643 °N

Longitude: -122.37080 °W

VI. Existing Site Conditions

- Are you aware of contaminated soils present on the site? Yes No
- Are you aware of groundwater contamination located within the site boundary? Yes No
- If you answered yes to questions 1 or 2, will any contaminated soils be disturbed or will any contaminated groundwater be discharged due to the proposed construction activity? Yes No

["Contaminated" and "contamination" here mean containing any hazardous substance (as defined in WAC 173-340-200) that does not occur naturally or occurs at greater than natural background levels.]

If you answered yes to Question 3, please provide detailed information on the locations, contaminants, and contaminant concentrations (if known), and pollution prevention and/or treatment Best Management Practices (BMPs) proposed to control the discharge of soil/groundwater contaminants. This information should include related portions of the Stormwater Pollution Prevention Plan (SWPPP) that describe how contaminated and potentially contaminated construction stormwater and dewatering water will be managed.

VII. Stormwater Pollution Prevention Plan (SWPPP)

You must develop a SWPPP prior to starting construction. Do **not** submit your SWPPP with your application. The exception is that Ecology may request a copy of all or part of the SWPPP if you answered yes to the questions in Part VI.

VIII. Best Management Practices (BMPs)

You must use the BMPs listed in the Stormwater Management Manual for Western Washington or the Stormwater Management Manual for Eastern Washington or other manuals approved by Ecology. Alternatively, you may use demonstrably equivalent BMPs on the basis of permit condition S9.C.4. If you intend to use a BMP at your site that is not included in these manuals, but that you believe meets the definition of a *demonstrably equivalent* BMP, you must notify the appropriate regional office.

www.ecy.wa.gov/programs/wq/stormwater/construction/contacts.html (See Definitions in the Construction Stormwater General Permit).*

**Note that if you receive permit coverage without indicating the preference for a demonstrably equivalent BMP and later decide to use one, you must provide Ecology with notice of the selection of an equivalent BMP no less than 60 days before the intended use of the equivalent BMP.*

IX. Discharge/Receiving Water Information

Indicate whether your site's stormwater and/or dewatering water could enter surface waters, **directly** and/or **indirectly**:

Water will discharge directly or indirectly (through a storm drain system or roadside ditch) into one or more surface waterbodies (wetlands, creeks, lakes, and all other surface waters and water courses).

If your discharge is to a storm sewer system, provide the name of the operator of the storm sewer system:

(e.g., City of Tacoma): City of Edmonds

(NOTE: If your stormwater discharges to a storm sewer system operated by the City of Seattle, King County, Snohomish County, City of Tacoma, Pierce County, or Clark County, you must **also** submit a copy of this NOI to the appropriate jurisdiction.)

Water will discharge to ground with 100% infiltration, with no potential to reach surface waters under any conditions.

If your project includes dewatering, you **must** include dewatering plans and discharge locations in your site Stormwater Pollution Prevention Plan.

Location of Outfall into Surface Waterbody

Enter the outfall identifier code, waterbody name, and latitude/longitude of the point(s) where the site has the potential to discharge into a waterbody (the outfall). Enter all locations. **See illustration of Surface Waterbody Outfall locations at the end of this form.**

- Include the names and locations of both direct and indirect discharges to surface waterbodies, even if the risk of discharge is low or limited to periods of extreme weather. **Attach a separate list if necessary.**
- Give each point a unique 1-4 digit alpha numeric code. This code will be used for identifying these points in WQWebDMR.
- Some large construction projects (for example, subdivisions, roads, or pipelines) may discharge into several waterbodies.
- If the creek or tributary is unnamed, use a format such as "unnamed tributary to Deschutes River."
- If the site discharges to a stormwater conveyance system that in turn flows to a surface waterbody, include the surface waterbody name and location.

| Outfall Identifier Code. These cannot be symbols. (Maximum of four characters). | | | | Surface Waterbody Name at the Outfall | Latitude Decimal Degrees | Longitude Decimal Degrees |
|---|---|---|---|---------------------------------------|--------------------------|---------------------------|
| Example: 001A | | | | Example: Puget Sound | 47.5289047° N | -122.3123550° W |
| 0 | 0 | 1 | A | Deer Creek | 47.79152° N | -122.37790° W |
| | | | | | ° N | -° W |
| | | | | | ° N | ° W |

If your site discharges to a waterbody that is on the impaired waterbodies list (e.g., 303[d] list) for turbidity, fine sediment, high pH, or phosphorus, Ecology will require additional documentation before issuing permit coverage and these sites will be subject to additional sampling and numeric effluent limits (per Permit Condition S8). Ecology will notify you if any additional sampling requirements apply. Information on impaired waterbodies is available online at: <http://www.ecy.wa.gov/programs/wq/303d/index.html>.

X. State Environmental Policy Act (SEPA)

This Notice of Intent (NOI) is incomplete and cannot be approved until the applicable SEPA requirements under Chapter 197-11 WAC are met.

Who is the SEPA lead agency on your site? Edmonds School District .

Has the SEPA lead agency issued a final decision on your checklist? (if there is a comment period, the SEPA decision is final at the close of the comment period) No Yes Exempt* (*attach written documentation if Exempt).

If No: The NOI is incomplete. Ecology will hold the application until a final SEPA decision is made or the Construction Stormwater NOI public comment period ends, whichever is later. You must notify Ecology once the SEPA lead agency has issued a final decision following any comment period.

If Yes: Type of SEPA threshold determination issued: Determination of Non-Significance (DNS) Mitigated DNS (MDNS)
 Determination of Significance (DS) Final Environmental Impact Statement (EIS) Other: _____

- Date when SEPA comment period ended or will end: 03/13/15 .

Notify Ecology if the SEPA determination is appealed. More SEPA information is available at:
www.ecy.wa.gov/programs/sea/sepa/e-review.html.

XI. Other Ecology National Pollutant Discharge Elimination System (NPDES) and/or State Waste Discharge Permits

List any other Water Quality permits (Industrial stormwater, Individual stormwater, etc.) for this site:

| Name of Water Quality Permit | Permit Number |
|------------------------------|---------------|
| | |
| | |
| | |

XII. Public Notice

You must publish a public notice at least once a week for two consecutive weeks with at least seven days between publications, in a newspaper of general circulation in the county in which the construction is to take place. Ecology cannot grant permit coverage sooner than the end of the 30-day public comment period, which begins on the date of the second public notice.

Mail or fax (360-407-6426) the NOI to Ecology on or before the first public notice date. If you fax the public notice to Ecology, you must also mail a hard copy. Failure to do so may delay the issuance of your permit.

Provide the exact dates (mm/dd/yy) that the first and second public notices will appear in the newspaper(s):

Name of the newspaper publishing the notices: Seattle Daily Journal of Commerce

First notice: 04/30 /15

Second notice: 05/07 /15 (Begins 30-day public comment period.)

For example: First notice: Friday 01/01/14 Second notice: Friday 01/08/14

PUBLIC NOTICE TEMPLATE

Complete this template using project-specific information and submit to a local newspaper with general circulation within the county where the project is located. The language in **bold** is required by WAC 173-226-130 and must be included in its entirety. (Either use the fill-in template below or **attach on a separate sheet of paper, if necessary.**)

Edmonds School District No. 15, contact Edward Peters, at 20420 68th Avenue West, Lynnwood, WA 98036, is seeking coverage under the Washington State Department of Ecology's Construction Stormwater NPDES and State Waste Discharge General Permit.

The proposed project, Former Woodway High School Multipurpose Sports Fields, is located at 23200 100th Avenue West in the City of Edmonds, in Snohomish County.

This project involves 5.92 acres of soil disturbance for grading, synthetic turf field resurfacing, paving and stormwater improvements construction activities.

(List all construction activities; for example, residential, commercial, industrial, highway, utility).

The receiving water(s) is/are Deer Creek (List all named and unnamed surface waterbodies, or ground water if applicable, waters identified in section IX).

Any persons desiring to present their views to the department of Ecology regarding this application may do so in writing within thirty days of the last date of publication of this notice. Comments shall be submitted to the department of Ecology. Any person interested in the department's action on this application may notify the department of their interest within thirty days of the last date of publication of this notice. Ecology reviews public comments and considers whether discharges from this project would cause a measurable change in receiving water quality, and, if so, whether the project is necessary and in the overriding public interest according to Tier II antidegradation requirements under WAC 173-201A-320.

Comments can be submitted to:
Department of Ecology
Attn: Water Quality Program, Construction Stormwater
PO Box 47696, Olympia, WA 98504-7696

XIII. Certification of Permittees

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Matt Finch / Edmonds School District No. 15
Printed Name / Company

Signature of Operator/Permittee

Design & Construction Manager
Title

04/29/2015
Date

*** Signature of Operator/Permittee requirements:**

- A. For a corporation: By a responsible corporate officer of at least the level of vice president.
- B. For a partnership or sole proprietorship: By a general partner or the proprietor, respectively.
- C. For a municipality, state, federal, or other public facility: By either a principal executive officer or ranking elected official.

Please sign and return this document to the following address:
Department of Ecology

PO Box 47696
Olympia, WA 98504-7696

JUL 17 2015

Transfer of Coverage

Construction Stormwater General Permit

WATER QUALITY PROGRAM

This form transfers permit coverage for all, or a portion Permit # WAR-303159
 of a site to one or more new operators.

Type of permit transfer (check one): Partial transfer Complete transfer

Specific date that permit responsibility, coverage, and liability, is transferred to new operator: 07/06/15

Please see instructions for details on type of transfer.

Current Operator/Permittee Information

| | | | |
|--|-----------------|---|---|
| For partial transfers: | | | |
| •List total size of project/site remaining under your operational control following transfer: <u>5.92</u> acres. | | | |
| •List total area of soil disturbance remaining under your operational control following transfer: <u>5.92</u> acres. | | | |
| •Submitting this form meets the requirement to submit an updated NOI (General Permit Condition G9) | | | |
| Current Operator/Permittee Name: <u>Stewart Mhyre</u> | | Company: <u>Edmonds School District</u> | |
| Business Phone: <u>425.431.7000</u> | Ext: | Mailing Address: <u>20420- 68th Avenue West</u> | |

Please convert all latitude and longitude coordinates into decimal degrees format. For help with this process, go to: http://www.fcc.gov/mb/audio/bicke/DDDMSS-decimal.html . | | | | |
| V. Existing Site Conditions | | | | |

1. Are you aware of contaminated soils present on the site? Yes No
2. Are you aware of groundwater contamination located within the site boundary? Yes No
3. If you answered yes to questions 1 or 2, will any contaminated soils be disturbed or will any contaminated groundwater be discharged due to the proposed construction activity? Yes No

["Contaminated" and "contamination" here mean containing any hazardous substance (as defined in WAC 173-340-200) that does not occur naturally or occurs at greater than natural background levels.]

If you answered yes to Question 3, please explain below or on a separate paper in detail the locations, contaminants, and concentrations, and pollution prevention and/or treatment BMPs proposed to control the discharge of soil/groundwater contaminants. Ecology may request a copy of your SWPPP.

VI. WQWebDMR (Electronic Discharge Monitoring Reporting)

You must submit monthly discharge monitoring reports using Ecology's WQWebDMR system. To sign up for WQWebDMR, or to register a new site, go to www.ecy.wa.gov/stormwater, and click on the "Construction Stormwater" link. You will find information on WQWebDMR under the "WQWebDMR and PARIS" link on the right-hand side. If you are unable to submit your DMRs electronically, you may contact Ecology to request a waiver. Ecology will generally only grant waiver requests to those permittees without internet access. Only a permittee or representative, designated in writing, may request access to or a waiver from WQWebDMR. To have the ability to use the system immediately, you must submit the Electronic Signature Agreement with your transfer of coverage form. If you have questions on this process, contact Ecology's WQWebDMR staff at WebDMR-Stormwater@ecy.wa.gov or 360-407-7097.

VII. Discharge/Receiving Water Information

Indicate whether your site's stormwater and/or dewatering water could enter surface waters, directly and/or indirectly:

- Water will discharge directly or indirectly (through a storm drain system or roadside ditch) into one or more surface waterbodies (wetlands, creeks, lakes, and all other surface waters and water courses).

If your discharge is to a storm sewer system, provide the name of the operator of the storm sewer system:

(e.g., City of Tacoma): City of Edmonds

(NOTE: If your stormwater discharges to a storm sewer system operated by the City of Seattle, King County, Snohomish County, City of Tacoma, Pierce County, or Clark County, you must also submit a copy of this NOI to the appropriate jurisdiction.)

- Water will discharge to ground with 100% infiltration, with no potential to reach surface waters under any conditions.

If your project includes dewatering, you must include dewatering plans and discharge locations in your site Stormwater Pollution Prevention Plan.

Location of Outfall into Surface Waterbody

Enter the outfall identifier code, waterbody name, and latitude/longitude of the point(s) where the site has the potential to discharge into a waterbody (the outfall). Enter all locations.

- Include the names and locations of both direct and indirect discharges to surface waterbodies, even if the risk of discharge is low or limited to periods of extreme weather. Attach a separate list if necessary.
- Give each point a unique 1-4 digit alpha numeric code. This code will be used for identifying these points in WQWebDMR.
- Some large construction projects (for example, subdivisions, roads, or pipelines) may discharge into several waterbodies.
- If the creek or tributary is unnamed, use a format such as "unnamed tributary to Deschutes River."
- If the site discharges to a stormwater conveyance system that in turn flows to a surface waterbody, include the surface waterbody name and location.

| Outfall Identifier Code. These cannot be symbols. (Maximum of 4 characters). | Surface Waterbody Name at the Outfall | Latitude Decimal Degrees | Longitude Decimal Degrees |
|--|---------------------------------------|-----------------------------|------------------------------|
|--|---------------------------------------|-----------------------------|------------------------------|
