PROJECT SCOPE

THIS WORK PROPOSED UNDER THIS PERMIT CONSISTS OF A VOLUNTARY SEISMIC UPGRADE. NO SITE MODIFICATIONS OF ANY KIND ARE PROPOSED.

WORK PROPOSED UNDER THIS PERMIT IS FOR THE FOLLOWING EXISTING STRUCTURES: UNITS A, C, E, F, G & H.

WORK AT REMAINING STRUCTURES IS UNDER SEPARATE PERMIT.

STRUCTURAL REVIEW NOTE

The seismic evaluation and renovation of the Former Woodway High School is being performed on a voluntary basis by the school district. It is important to note that this retrofit is not required per UBC 3401. The 1997 Uniform Building Code allows "alterations of existing structural elements, or additions of new structural elements, which are not required by Section 3401 and are initiated for the purpose of increasing the lateral-force-resisting strength or stiffness of an existing structure" provided they meet the criteria described in the exception to 3403.2. The alterations comply with Items 1-5 listed in the exception of 3403.2. All alterations to the structural elements in the construction documents are provided to increase the lateral-force-resisting strength or stiffness.

The basis of the evaluation was the Federal Emergency Management Agency document 178 (FEMA-178.) NEHRP Handbook for the Seismic Evaluation of Existing Buildings.

PROJECT SCOPE

THIS WORK PROPOSED UNDER THIS PERMIT CONSISTS OF A VOLUNTARY SEISMIC UPGRADE. NO SITE MODIFICATIONS OF ANY KIND ARE PROPOSED.

WORK PROPOSED UNDER THIS PERMIT IS FOR THE FOLLOWING EXISTING STRUCTURES: UNITS B-1, B-2 & D.

WORK AT REMAINING STRUCTURES IS UNDER SEPARATE PERMIT.

STRUCTURAL REVIEW NOTE

The seismic evaluation and renovation of the Former Woodway High School is being performed on a voluntary basis by the school district. It is important to note that this retrofit is not required per UBC 3401. The 1997 Uniform Building Code allows "alterations of existing structural elements, or additions of new structural elements, which are not required by Section 3401 and are initiated for the purpose of increasing the lateral-force-resisting strength or stiffness of an existing structure" provided they meet the criteria described in the exception to 3403.2. The alterations comply with Items 1-5 listed in the exception of 3403.2. All alterations to the structural elements in the construction documents are provided to increase the lateral-force-resisting strength or stiffness.

The basis of the evaluation was the Federal Emergency Management Agency document 178 (FEMA-178). NEHRP Handbook for the Seismic Evaluation of Existing Buildings.

5. CONTRACTOR SHALL VERIFY ALL EXISTING DIMENSIONS, MEMBER SIZES AND CONDITIONS PRIOR TO COMMENCING ANY WORK. ALL DIMENSIONS OF EXISTING CONSTRUCTION SHOWN ON THE DRAWINGS ARE INTENDED AS GUIDELINES ONLY AND MUST BE VERIFIED. THE EXISTING CONDITIONS SHOWN ON THE DRAWINGS ARE BASED EITHER ON SITE OBSERVATION, ORIGINAL DRAWINGS OR WERE ASSUMED BASED ON EXPECTED CONDITIONS. IF THE EXISTING CONDITIONS DO NOT CLOSELY MATCH THE CONDITIONS SHOWN ON THE DRAWINGS, OR IF THE EXISTING MATERIALS ARE OF QUESTIONABLE OR SUBSTANDARD QUALITY, NOTIFY THE ENGINEER PRIOR TO COMMENCING ANY WORK.

6. CONTRACTOR SHALL PROVIDE TEMPORARY BRACING FOR THE STRUCTURE AND STRUCTURAL COMPONENTS UNTIL ALL FINAL CONNECTIONS HAVE BEEN COMPLETED IN ACCORDANCE WITH THE DRAWINGS.
